# NIMISH NERLEKAR

UI/UX Designer, Product Designer, Visual Designer

I'm a strategic and imaginative designer and I create impactful, human-centric products and experiences. I love helping businesses grow through design, whether working independently or in a team. Driven by curiosity, I enjoy analysing data, solving problems, and contributing to society in meaningful ways.

I'm passionate about art, philosophy, and psychology, and I help authors publish and design their books. Video games inspire my creativity, and as a 3D printing expert, I enjoy crafting toys in my spare time. My goal is to create engaging, impactful work that makes people happy.

EXPERIENCE `2+ YOE`

UI/UX designer (July 2022 - Present)
Codewalla, Pune

1. Led the design for a range of projects, including key products like 1Huddle and Infraclear. (game-tech, Edu-tech and Fin-tech)
2. Worked on websites, internal projects, and established style guides.
3. Collaborated closely with development teams and US-based clients, ensuring smooth communication and timely project delivery.
4. Took charge of hiring and mentoring two junior designers.
5. Contributed to AI projects with innovative design solutions and developed a unified design system for 1Huddle to ensure a seamless user experience.
6. Quickly mastered UI animation to bring energy and engagement to the designs.

Junior Industrial Designer (Jan 2022 - July 2022)
TI Cycles of India, Chennai

1. Successfully completed a six-month graduation project while concurrently managing multiple internal projects for the company, showcasing exceptional multitasking abilities and dedication.
2. Collaborated closely with mechanical engineers and factory technicians to design cycles and related products, demonstrating effective teamwork and cross-disciplinary collaboration.
3. Conducted extensive research to design Color, Material, and Finish (CMF) options and stickers for the cycles, contributing to their successful launch in the market.
4. Partnered with marketing leads and project managers to design sustainable electric vehicles and cycles, highlighting a proactive approach to addressing environmental concerns.
5. Achieved a remarkable 10 SGPA (Semester Grade Point Average) for the last university semester, underscoring academic excellence and commitment to high standards of performance.
